

kartell

a comfortable chair in transparent and colored polycarbonate in the louis xv style: it is the quintessence of baroque revisited to dazzle, excite and captivate. louis ghost is the most daring example of injected polycarbonate in a single mould. despite its evanescent and crystalline appearance, louis ghost is stable and durable, shock, scratch and weather resistant. it can also be stacked six high. this article has great charm and considerable visual appeal and brings a touch of elegance and irony to any style of home or public place. you can even choose to personalize your louis ghost furniture. kartell offers four standard themes but further themes can be created upon specific request. the commissioning of personalized furniture is subject to a minimum order size of 50 articles.
